Dhanada Panda

Bengaluru, India | +91-7205656515 | dhanada1502@gmail.com | GitHub | LinkedIn | LeetCode | Portfolio

Summary

Results-driven Software Development Engineer with hands-on experience in full-stack web development using Angular, React.js, Node.js, and Python. Expertise in designing scalable UI component libraries, building RESTful APIs, and developing real-time applications using WebSockets. Proficient in Java, JavaScript, TypeScript, and cloud deployment. Strong foundation in Data Structures & Algorithms, Machine Learning, and Agile methodologies.

Technical Skills

- **Languages**: Java, Python, C++, JavaScript, TypeScript, SQL
- **Frontend**: Angular, React.js, HTML5, CSS3, Bootstrap, Responsive Design, WordPress
- **Backend**: Node.js, Express.js, REST APIs, WebSocket, Flask, Spring Boot
- **Databases**: MongoDB, MySQL, Oracle, PostgreSQL
- **DevOps & Tools**: Git, GitHub, CI/CD, Docker, Power BI, JIRA, VS Code
- **Libraries & Frameworks**: Pandas, NumPy, Scikit-learn, Matplotlib, XGBoost
- **Concepts**: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Machine Learning, Software Development Life Cycle, Agile/Scrum

Experience

- **Digit Insurance** — Bengaluru, India
  Software Development Engineer — *July 2025 – Present*
  - Developed and packaged a reusable Angular UI component library with pre-styled form fields and UI components, enabling consistent design and faster development across 5+ internal applications.
  - Built 15+ reusable and configurable components including input fields, snackbars, modals, and form controls, reducing development time by 40%
  - Reduced code duplication by 60% through component reusability, shared design tokens, and modular design patterns
  - Collaborated with a cross-functional team of 8 engineers to integrate the UI library across multiple production modules
- **Athrv Cloud** — Bhubaneswar, Odisha, India
  Cloud Technology Intern — *January 2025 – July 2025*
  - Developed 3+ full-stack web applications using React frontend and Python (Flask) backend for real-time data processing
  - Designed and implemented RESTful backend services serving 1000+ API requests daily with state management and API integration
  - Reduced page load time by 30% through code optimization, lazy loading, and caching strategies
  - Deployed applications on cloud infrastructure using CI/CD pipelines and Git-based version control

Projects

- **HomelyHub** — *React.js, Node.js, Express.js, MongoDB* [GitHub]
  - Developed a MERN platform connecting 50+ donors with distribution centers; implemented JWT authentication and RBAC dashboards
  - Built real-time donation tracking and optimized MongoDB queries, reducing API response time by 35%
- **ChatterSphere** — *Node.js, Express.js, WebSocket, JavaScript* [GitHub]
  - Engineered a real-time chat application supporting 100+ concurrent users with sub-50ms latency using WebSockets
  - Designed scalable event-driven architecture with group chats, typing indicators, and 99% message delivery reliability
- **Health Insurance Cost Prediction** — *Python, Scikit-learn, Pandas, NumPy* [GitHub]
  - Built a regression model achieving 92% accuracy for insurance cost prediction using 1300+ healthcare records
  - Evaluated multiple ML algorithms (Linear Regression, Random Forest, XGBoost) with feature engineering and hyperparameter tuning

Education

- **Silicon University, Bhubaneswar** — Odisha, India
  Bachelor of Technology - Computer Science and Engineering (CGPA: 9.56/10) — *July 2021 – June 2025*
- **The Mother's International College, Brahmapur** — Odisha, India
  CHSE - Science (Percentage: 91%) — *July 2019 – June 2021*

Certifications

- **Data Structures & Algorithms using C++** [View Certificate]
- **Google Solution Challenge Participant** [View Certificate]
- **Salesforce Developer Virtual Internship** [View Certificate]
- **MEAN & MERN Stack Development** [View Certificate]
